Very large flower in deepest bronze-orange. Violet throat.
A deep red with purple cast and ribbon-like sepals.
Rose-bengal outer petals with vermillion lips and inner petals.
Similar to Hermosissimus but with broader petals.
Blood red. Violet throat and white anthers.
Large, brilliant persimmon lightly margined in violet.
Very large and flat, star-like, scarlet-orange with violet shadings.
Many colored flower: rose-bengal, orange-purple blended interestingly.
Lovely flower. Outer petals deep red; inner petals violet and white.
Two-toned carmine. Has appearance of red and yellow stripes.
Wide open flower in orange, violet and lavender.
Very dainty flower in softest pink. Star-like form.
An eleven inch flower in orange, bronzy-violet and lavender.
Beautiful shell-pink basket type.
A large flower of crepe-like texture in soft pink feathered in white.
Rhodamine purple. Frilled, orange throat.
Many petaled ten inch flower in molten gold. Bronze sepals.
Geranium Lake, purple throat, fire-red outer petals.
Double bells of rose-cinnabar. Basket type.
Finest type broad petaled flower in royal purple and cerise with whitish throat.
Turkey-red cup and saucer.
Fire red outer petals; frilled, vermillion inner petals.
Orange tinged with scarlet. White stigma and anthers.
Rosy lavender deepening to violet with age.
Carmine-rose with dark throat; orange sepals; very striking.
Pure white petals and lemon-yellow sepals.
A symphony in orange and poppy red.
A glorious flower of molten gold and violet. Vermillion eye.
Immense flower with many slender orange petals margined in flame.
Double, cupped, narrow petals in blue-lavender and orange-violet.
Large two-toned scarlet-orange with vermillion eye.
A flat, open flower in softest silvery pink.
A most unusual and orchidaceous flower in violet, lilac and white.
Very large and sparkling white with soft yellow and brown margin petals.

“specializing the unusual”

# EPIPHYLLUMS

Of all the beautiful flowering plants imported from the four corners of the earth, none can excel in spectacular appeal the epiphyllums. Although native to the tropical countries such as Brazil, Mexico and the Argentine, the majority of these gorgeous types have in the past been hybridized in Europe. And now in our own Southern California numerous, superior kinds have been developed.

One could imagine nothing more congenial to Southern California climate and modern day architecture than these streamlined plants bearing a profusion of strikingly beautiful flowers from 6 to 10 inches in diameter, in all the colors of the rainbow. There are white kinds fringed in lime yellow and soft brown, pinks in monotone or iridescent tints, purples with flame and chartreuse, molten gold with vermillion, bronze with scarlet, blood-red with violet and others too numerous to mention.

Some types are effective in wall or hanging baskets, but the majority display their charms to best advantage when trained against a trellis or wall.

Our "Jeweled Corridor" during May and June presents a spectacle of dazzling beauty that you cannot soon forget. Bring your friends and give them a real treat.

# EPIPHYLLUMS

## CULTURE

For best results, plant your Epiphyllums in a semi-shady location in a mixture of 1/3 good sandy loam and 2/3 well rotted oak leafmold. Add 1 teaspoon of bonemeal to the soil mixture for a 6-inch pot and proportionately more for larger containers.

Give them a heavy dressing of steer fertilizer in February and a light top-dressing of a good commercial fertilizer in August.

Keep them moderately moist, varying with the seasons, and be sure that their drainage is good.
